Twelve contradictions, seven of scope

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Seven contradictions were not contradictions: the two sources spoke of different scopes.**

Nature	Count
Scope difference, revealed by comparison	**7**
Real contradiction	**5**

The three arbitrations the agent does not make

Tempting rule	Used?	Why
Take the most recent	**No**	**An update can be a mistake**
Take the most cited	**No**	**That is the circular chain**
Take the most official	**No**	**It may cover a different scope without saying so**

What is handed back for each position

Element	Supplied?
The source	**Yes**
The date	**Yes**
The exact scope covered	**Yes**
What distinguishes them	**Where establishable**
The check that would settle it, and with whom	**Yes**

Not an answer, but actionable — which an arbitrary choice would not have been.

> **Request a demo with your own documents**
>
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
