Editorial framework and production log

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

2 automatic actions, 96 human approvals · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This is the document management or an auditor asks for, and it fits on one page.** It states what the agent does without asking — two actions, both approved once and reversible — and what the log keeps of every piece produced.

The only two automatic actions

Action	What it does exactly	What it does NOT do	Reversibility
Highlighting claims more than three years old	**Marks the claim and escalates it to the engineering office — approved once, on 2 April**	**Deletes nothing, rewrites nothing**	**The threshold changes with a word; an updated source removes the highlight with no intervention**

Action	What it does exactly	What it does NOT do	Reversibility
Rebuilding adaptations when the source content changes	**Redoes newsletter, sales script and pages as drafts, with a record of what moved**	**Publishes nothing, sends nothing**	**The previous version is kept and restores with a word**

The five acts that stay human — and what they earn you

The act	What you gain
Publishing a piece of content	**The content is ready and dated; the agent has no write access to the site's content manager, and the previous version restores with a word**
Sending a newsletter	**The draft is built and reviewed; the agent has no write access to the emailing tool, and nothing goes out in your name without you**
Settling between two versions of a standard	Both versions, their dates and the pages affected are put in front of you: your engineering office settles it in one reading, and a conformity is certified, it is not inferred from a file date
Wording a mandatory statement	It is carried over word for word from your templates, and flagged when it is missing: rephrasing it, even better, would change its scope
Measuring a missing characteristic	**It is flagged “to be completed”, never guessed: a guessed value is indistinguishable from a measured one once written, and it is the guessed one that ends up in a customer specification**

What the log keeps, piece by piece

Item logged	What it is for the day someone asks
The template used	Check that a format has not drifted

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Item logged	What it is for the day someone asks
The list of sources, with their dates	**Trace where a disputed claim came from, years later**
The claims highlighted	Show what was flagged before publication
Who asked, who approved	**Prove human supervision rather than declare it**
What changed between first draft and publication	**Measure what the review adds, and where it lands**

The three handovers to dedicated agents

Agent	What it takes on	What the copywriting assistant hands it
Social media	Scheduling and publishing	**The approved content and its citable measurements, with sources — 4 posts last year carried a figure absent from the source content**
Market monitoring	Competitors, trade press, regulation	**Nothing: it supplies the material — last year's 12 articles all started from an internal idea**
Translation	**Outside the present offer: a dedicated agent, which sets its own languages, its formats and its human approval**	**APPROVED content, never a draft, with its dated sources and its highlighted claims**

The four figures of the arrangement

Figure	Value
Hosting	**100 % in France, under French law**

Figure	Value
Data outside the European Union	**0 — architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**
Content formats ready to deploy	**6**
Decisions with a legal or significant effect taken by an agent	**0, across 96 logged productions**

For the company to set

First handover activated and go-live date: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
> https://bluelemonagent.ai/en/entreprises/cas-usage/assistant-de-redaction-contenu-marketing

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
