Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **No characteristic is guessed.** When a value is missing from the PIM, the line stays empty and reads « to be completed »: **a guessed value is indistinguishable from a measured one once it is written down** — and it is the guessed one that ends up in a customer specification.

Where each sentence comes from

Type of content	Single source	What you gain
Technical values	**Catalogue PIM**	Every published value is the PIM's: no more gap between the web page and the manual the customer downloads
Operating limits	Current manual, index in force	**Carried over word for word: their scope stays intact, and that is what covers you in a dispute**

Type of content	Single source	What you gain
Performance figures	Test reports	Always with their test conditions: a figure without conditions is a figure the customer turns against you
Uses described	Application notes and visit reports	**Every claim points back to something the company wrote: your salesperson can source it in front of the customer**

The state of the 214 pages, before and after

Item	Before	After
Length	**40 words, lifted from the 2019 catalogue**	**180 to 260 words, « product page » template**
Operating limits present	**27 pages out of 214**	**214 out of 214**
Link to the current manual	Absent	Systematic, with the index
Complete pages, ready to review	—	**176**
Pages with at least one « to be completed » line	—	**38, with the missing characteristic named**

What that represents in time

Work	Estimate at the usual pace	Today
Rewriting the 214 pages	**More than a full-time quarter**	**Done**
Review	—	**8 minutes a page, around 4 days for the 176 complete ones**

Legal notice (in French): bluelemonagent.ai/mentions-legales

Work	Estimate at the usual pace	Today
Order proposed	—	**The 26 references carrying 60 % of revenue, at the front of the batch**

Found along the way, and worth more than the pages: 38 discrepancies between what the PIM says and what the manual for the same reference says. They are raised, none has been settled — **arbitrating between two technical sources is a company decision, and it is written once for all 340 references.**
