## Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document**, produced for the demonstration. **Indexing works on the CONTENT of files, not on their names.** The manual that prevails for the DP-40 pump is called *DP40\_manual\_VF\_v3\_OK\_final.pdf* and carries neither its revision index nor its date in its name.

## The DP-40 case — eleven files, one prevails

| What is read inside the document | What it gives                                     |
|----------------------------------|---------------------------------------------------|
| Revision index                   | <b>D — the most recent of the eleven</b>          |
| Signature date                   | 18/02/2026                                        |
| Product reference in the header  | DP-40, even when the file name does not carry it  |
| Internal cross-references        | Linked documents surface with the document sought |

## The time going back to the documentation moves

| Task                                          | Before                         | After      | What is left to do                                             |
|-----------------------------------------------|--------------------------------|------------|----------------------------------------------------------------|
| <b>Going back to the source documentation</b> | <b>28 % of production time</b> | <b>8 %</b> | <b>Check that the source retained is the one that prevails</b> |

## The three manuals to replace first

| Reference    | Index live | Index in force        | Pages concerned                    |
|--------------|------------|-----------------------|------------------------------------|
| <b>DP-40</b> | B (2022)   | <b>D (18/02/2026)</b> | 2 product pages, 1 range page      |
| SR-12        | A (2021)   | C (09/2025)           | 1 product page                     |
| BX-08        | A (2020)   | B (04/2024)           | 1 product page, 1 application note |

**What indexing does not do:** it **renames nothing, moves nothing, deletes nothing**. Existing paths keep working, and **if the monthly pass is stopped, the index already built stays**.

## For the marketing manager to decide

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
