Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The coverage measured concerns what the company saw.** What nobody saw escapes any measure — and that is what the sources proposed at the end of this document go after.

Source watched	Type
Platform 1	**Publication**
Platform 2	Publication
Platform 3	Publication
Platform 4	Publication
Buyer feed 1	**Direct**
Buyer feed 2	Direct

The three areas outside scope, named

Area outside scope	Why	Estimate
Buyer profile outside the 4 platforms	**Local publication only**	**Unknown**
Contract awarded without publicity	**The value allows it**	**Unknown**
Tender relayed by a private client	**Their own portal**	**Unknown**

The measurement, over twelve months

Origin of the 23 tenders you bid on	Count
Flagged by the monitoring	**20**
Learned from a client	**1**
Learned from a peer	**1**
Received by direct email	**1**

> **Twenty of twenty-three is an honest figure, and the agent states its exact reach.** It counts the tenders the company knew about; it does not claim to count those nobody ever learned of.

What is proposed

Action	Expected effect
Add the buyer profiles of your 11 public clients	**Where the tenders that concern you most sit**
Add the portals of the 4 recurring private clients	Covers the third area

The second area — contracts awarded without publicity — is covered by the commercial relationship rather than by a tool. The agent says so rather than sell coverage it does not have: it is the same rigour that makes the other twenty reliable.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
