What a draft may state

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

1,240 drafts · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **They are not the agent's commitments: they are yours, already written, and it quotes them.**

What is written today

Element	Source
What appears in the thread	**Quoted with its date**
What an internal document says	**The document, with its date**
The REAL observed lead time for that request type	**Your own statistics**

What opens by granting access

Source opened	What the draft may then state
Terms and conditions	**A warranty**
Rate card	**A rate-card price**

Source opened	What the draft may then state
Lead-time catalogue	**A contractual lead time**

What is still not written

Wording	Written?	Why
"We will make a gesture"	**No**	**Exists in no document**
"Exceptionally, we can"	**No**	**Binds more surely than a price**

These cases come back **with the thread and a draft ready to approve.**

The figure published against the agent

Finding	Value
Drafts prepared	**1,240**
Sent	**890**
Edited before sending	**610**

> **It is the only honest measure of what the agent is worth, and it pulls no punches.** The reason for each correction is kept — **that is what brings the figure down.**

For the company to settle

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
