Technical framework — where your templates live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, processing in the EU targeted · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **Two possible architectures, and no other:** local inference on a machine at the house, or an isolated resource hosted in France under French law. *Local inference means the model computes on your machine: the text of a template crosses no outside network to be processed.*

The two architectures

Criterion	Local inference	Isolated resource in France
Where the model computes	A machine at the house	Dedicated server, France
Templates leaving the network	**None**	Encrypted link, France only
Pooling	Not applicable	**None — an environment strictly dedicated to your business**

Criterion	Local inference	Isolated resource in France
Transfer outside the EU	**None in the target architecture**	**None in the target architecture**
Cloud Act / FISA 702	**Exposure reduced by design**	**Exposure reduced by design**

Your templates, your brand guide, your photographs

Question	Answer	What guarantees it
Do the templates train a third-party model?	**No**	What the agent learns from the house serves the house
Do the bakehouse photographs leave?	No	Processed on the machine or on the dedicated resource
What happens to the brand identity?	**It stays your property**	The agent produces drafts; the house publishes

Access, log and oversight

Mechanism	What it does	What it is for
Encryption in transit and at rest	Protects templates, brand guide and photographs	—
Role-based access	**The communications officer opens drafts and the calendar; prices and the commercial diary stay with the owner**	Limits exposure on a mistake or a departure
Full log	Who approved what, when, which version went out	**Answering a question a year later**
Human oversight end to end	The agent prepares, a named person approves, nothing goes out without her	**What the AI Act expects of an assistive system**

Integration — what changes in the tools

Tool in place	What the agent does	Migration
Scheduling tool	Places drafts and proposed slots	**None**
Drive holding the brand guide and photographs	Reads, renames nothing	**None**
Commercial diary	Reads the milestones, surfaces the preparation dates	**None**
Till software	Reads the prices applied and the stock	**None**

A network added tomorrow is added to the constraints table, not to the workload. The templates don't change: it is the derivation that learns one more format.

Architecture chosen (local inference / isolated resource): _____

Log retention periods set by the house: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
