

Technical framework — where your management data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Local inference, role-based access, processing in the EU targeted · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **An executive cockpit brings together the most complete view of the company that exists** — margins by customer, costs by site, payroll, unannounced projects. No other tool holds that whole. **That is precisely why it does not leave the company.**

The two possible architectures

Architecture	Where the computation happens	What leaves the company	For whom
Local inference	On a machine at head office	Nothing	A company willing to host a machine
Isolated resource hosted in France	In France, under French law	Nothing outside the European Union	A company with no server room — no pooling with any other

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

Local inference means the model computes on your machine: an investment scenario crosses no outside network to be costed.

The protections, one by one

Protection	What it covers	What it prevents
No model training	Scenarios, assumptions, consolidated data	That a company figure resurfaces elsewhere
Encryption in transit and at rest	Every flow and every store	Reading a file outside the intended access
Role-based access	Rights follow the job	That a site director sees the payroll of other sites or the board's projects
Logging	Every scenario, every assumption, every consultation	That a figure changes without anyone knowing who, when and why
Hosting in France, under French law	All management data	Exposure to the Cloud Act and FISA 702 left unexamined
SecNumCloud and reinforced hosting options	Corporate finance, confidential reorganisation	Shared infrastructure on the most sensitive subjects

Role matrix, as configured

Role	Sees	Does not see
Executive committee (6 people)	All scenarios, all assumptions	No individual employee data
Finance director	Everything, plus settling the assumptions	No individual employee data

Role	Sees	Does not see
Site director	The scenarios concerning his site	The payroll of other sites, unannounced projects
Management accountant	The consolidated foundation and the measured assumptions	Compartmented corporate finance scenarios
Compartmented scenario (range closure)	The 3 designated committee members	Everyone else, including on the committee

Compartmenting is set in one line and is logged. It is safer than a verbal instruction, and above all it can be proved — which a verbal instruction never can.

The offer benchmarks, verifiable

Benchmark	Value
Hosting in France, under French law	100%
Data outside the European Union	0
Executive uses ready to deploy	6
Decisions taken without human validation	0
Extra subscriptions for committee members	0

Architecture chosen (local inference · isolated resource in France): _____

Compartmented scope of the range-closure scenario — designated members: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 10 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

deployment chosen.
