

Draft deliberation and summary note

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 20/10/2026

Draft · to be adopted by the community council · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional scenario — figures invented to illustrate how it works; no client result is claimed.

In a local authority or an EPCI, the agent prepares the draft resolution; the deliberative body adopts the DUERP.

Step	Who (role)	Status
Approval of the draft version 4	Prevention adviser, then local authority executive	To do
Opinion on the annual programme	Specialised committee	To be referred by the local authority executive
Adoption of the DUERP	Community council	To be deliberated
Transmission to the occupational health service	Local authority executive	After adoption

Each year, the competent specialised committee is consulted for its opinion on the annual prevention programme. References in force: CGFP, Art. R. 253-23, R. 253-27 and R. 253-30.

Each validated update is prepared for transmission to the competent preventive medicine service; sending remains triggered or validated by the employer.

The French version of these texts is authoritative.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
