As at 5 October 2026 · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional scenario — figures invented to illustrate how it works; no client result is claimed.

Collective indicator	Value	Calculation
Observations recorded in 2026	61	Rows of the source register
Observations linked to a unit and a source	61 of 61	Rows whose « Unit » column is filled in
Median time to link	5 days	Median of the « Days » column of the register
Observations recorded in 2025	38	2025 register (fictional)
Actions of the 2026 programme	17 of 24 closed on proof	17 closed, 5 in progress, 2 postponed with a reason

Collective indicator	Value	Calculation
Units to reassess	2	Central kitchen, reheating kitchens: new information
Version in force	Version 3, adopted on 05/03/2026	7 months ago as at 05/10/2026

In this fictional scenario, the number of recorded observations increases. The demonstration does not attribute the cause to the agent.

The DUERP is updated at least every year from 11 staff and, whatever the headcount, upon a major change or when new information on a risk becomes known.

The French version of these texts is authoritative.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
