Three rules, nine creations abandoned

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **None of the three agents is wrong within its scope: the company has three rules.**

Agent	Source of its rule
Agent A	**Standard contract**
Agent B	**2024 internal note**
Agent C	**Commercial practice**

A customer who asks in two places gets two answers.

What the platform does, and does not

Action	Done?
Choose the most recent rule	**No**
Choose the most frequent	**No**

Action	Done?
Pass the three rules and sources to whoever owns the subject	**Yes**
Mark the subject "rule not unified" in the inventory	**Yes, until settled**

Prevention at creation

Creating an agent on an already covered subject is **flagged, not forbidden**. **Nine creations were abandoned after that flag over six months.**

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
