Four agents more powerful than their creator

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **It is not an intention: it is a consequence, and it is invisible from both sides.**

Finding	Value
Agents running on a broad service account	**4**
Whose creator lacks access to part of what the agent reads	**4**
Agents using less than half the rights open to them	**29 of 41**

> **A person can obtain, by asking their own agent a question, information they could not have opened directly.**

The rule applied

An agent cannot have more rights than the person it works for. **Where it acts for several people, it applies the rights of whoever is asking.**

Outcome for the 4	Result
Continued identically — broad rights unused	**2**
Access to a source explicitly reopened	**1**
Stopped: should not have existed in that form	**1**

An unused right is one that can be withdrawn without breaking anything.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
