Technical framework — where your documents live

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

France, isolated resource, read-only · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually offered.** A document platform concentrates the written assets of the company: governing it is a security requirement, not a stylistic clause.

The two deployment modes, for the IT department to choose

Mode	Where computation happens	What leaves the network	For whom
Local inference	**On a machine belonging to the company**	**Nothing**	Companies that already host their own servers
Isolated resource	On a dedicated server hosted in France	**Nothing outside the European Union**	Companies that would rather not administer a machine

In both cases the resource is strictly dedicated. No pooling with another company, nor with another document base: your procedures, your drawings and your production run files live in an environment that is yours alone.

The eight points your auditors look at

Point	Implementation	What you can write to a customer
Training	**None of your documents trains a model**	“What the platform learns from our base serves our base”
Writing into sources	**None — read-only across the 9 sources**	“No document can be modified by the platform, not even by mistake”
Encryption	In transit and at rest	“An intercepted file stays unreadable”
Role-based access	**Rights follow the function, not the person**	“Only the roles named in the contract open your files”
Logging	Consultations, exports, access decisions	“We produce a dated record, not a statement”
Hosting	**France, under French law, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**	“Your data is processed within the European Union in the architecture chosen”
Isolation	Dedicated resource, no pooling	“Your base sits next to no other company's”
Decisions	**No access opened, no version published without a written decision**	“Governance stays ours”

What that is worth, in figures

Fact	Value
Customers imposing hosting in France in their framework contract	**4 out of 6**
Customers requiring a consultation log	**3 out of 6**
Questions of the last audit questionnaire covered by this document	**34 out of 38** — the remaining 4 are your retention periods
Data transfers outside the European Union, over the half-year	**0**
Documents modified by the platform, out of 214,000	**0**

> **For executive spaces, employee data and documents covered by professional secrecy**, reinforced hosting options exist according to your level of requirement. A single architecture is designed to answer both the GDPR and extraterritorial exposure.

For the IT department to settle

Deployment mode chosen (local inference / isolated resource): _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
