Document base inventory — 9 sources, 214,000 documents

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

First pass, before anything is connected · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **The inventory is built read-only:** no file was moved, renamed or modified. *The document base is every document the company keeps and uses, whatever the source it sits in.*

What each of the nine sources holds

Source	Documents	Main content	What it brings to the base
Quality document system	**38,400**	Procedures, work instructions, records	**The only source carrying a version register**
Technical documentation	51,200	Manuals, parts lists, drawings	The heart of the business — maintenance returns to it daily
File server	46,900	Production run files, minutes	Structured by site, not by project

Source	Documents	Main content	What it brings to the base
Collaboration spaces (2)	39,700	Live projects, attachments	**Where duplicates are born**
Intranet	8,600	Service notes, templates	Internal distribution
Shared mailboxes (2)	12,800	Exchanges with customers	**No structure at all: indexed by content**
Project archive	16,400	Closed files	**Proof of what applied at the time of delivery**
Total	**214,000**	—	**2,300 new filings a month**

The gap the inventory brings to light

Measured finding	Value	What it costs today
Searches confined to a single source	**71%**	**The person finds a document without knowing another one exists elsewhere**
Documents present in at least two sources	**61,400** — 29% of the base	Two copies of the same text, two access paths, two sets of rights
of which copies NOT identical to each other	**12,300**	**This is the population that produces version errors**
Annual hours spent looking for documents	**3,640 h**	**More than two full-time equivalents, from the activity records**

The time unified search shifts

Task	Today	With the platform	In hours
Source-by-source search	**65% of the time a document search takes**	**7%**	**3,640 h → 392 h a year**

What does not change: the nine sources stay in place, with their paths, their file names and their habits. **The platform reads; it writes into no source.** Ending the subscription would leave the nine sources exactly as they stand today.

For the IT department to settle

Connection order chosen for the nine sources: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
