> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **The sort judges no content:** a document is superseded when the register designates a later version. An effective date and a publication number are enough — which is what makes this table indisputable in an audit.

The sort, by what matters

Location	Documents	Risk	Proposed handling
Spaces open to the workshops	**143**	**High — printable this morning**	**Unpublished by the administrators, batch prepared**
Project spaces	612	Medium — consulted occasionally	Banner in place, quarterly review

Location	Documents	Risk	Proposed handling
Project archive	**505**	**None — keeping them is a proof obligation**	**NOT to be removed: banner only**
Total	**1,260**	—	—

What the platform does, and what it does not

Action	Done by the platform?	Effect
Stop serving the document as a reference	**Yes, automatically**	**Nobody lands on 4.1 without knowing it**
Place the banner “superseded on … by …”	**Yes, automatically**	Reversible if the register is corrected
Prepare the removal batch by space and by owner	**Yes**	**4 minutes for 38 documents on the two spaces already handled**
Remove or delete a file in the source	**Never**	**The platform works read-only — deletion is irreversible and touches contractual proof**

The result obtained without touching a file: the 1,260 superseded documents are no longer served as references, and each one names its replacement. **The administrators' pass no longer catches a mistake: it tidies a base that is already safe.**
