Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Both files are right, on two different dates.** The problem is the information circuit, not the quality of the keying.

Variation	Signed	Original amount	Amount after variation	Gap	Carried into the grants file?
1	12/03/2026	€48,000	€54,000	**+ €6,000**	**No**
2	19/03/2026	€22,000	€18,500	**− €3,500**	**No**
3	02/04/2026	€95,000	€107,000	**+ €12,000**	**No**
4	14/04/2026	€12,000	€12,000	—	—
5	28/04/2026	€61,000	€55,400	**− €5,600**	**No**
6	11/05/2026	€31,000	€38,200	**+ €7,200**	**No**
7	26/05/2026	€74,000	€79,500	+ €5,500	**No**
8	09/06/2026	€18,000	€14,200	− €3,800	**No**

Variation	Signed	Original amount	Amount after variation	Gap	Carried into the grants file?
9	23/06/2026	€40,000	€44,000	+ €4,000	**No**
Cumulative	—	—	—	**€47,600**	**0 of 9**

> **Zero out of nine is not a repeated oversight: it is the absence of a circuit.** No variation was carried over, which shows nothing provides for them to be — and that no amount of individual diligence will change it.

What is proposed

Trigger	Action	What keeps the file checkable
A variation is signed	**Flagged to the department holding the second file**	**No copying of the amount**
Variation not carried over at 15 days	Reminder	—
Quarter end	List of variations and their carry-over	**No automatic correction**

Automatic copying would be technically trivial and practically dangerous: a file fed by a tool without anyone knowing where the value came from is a file nobody checks any more.
