What is kept, what is prevented

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **A tool that matches files is technically one step from a tool that cross-references all of them.** That step is not taken, and it is not taken by design.

Item	Kept?	Why
The match proposed	**Yes**	Retracing the path
Agreeing and diverging fields	**Yes**	**Justifying a decision after the fact**
The decision taken	**Yes**	Who decided, and when
The date	**Yes**	Chronology
Matching between unpaired files	**Impossible**	**No implicit pairing**
Profile built by crossing several sources	**Impossible**	**That would be a register of people**
Data copied from one file to another	**Impossible**	**The agent writes into no file**

How the prohibition holds technically

Mechanism	Effect
Pairing declared pair by pair	**Two unpaired files never see each other**
No writing, into any file	**No data migrates**
No global index of people	**No point where everything would converge**

> **What that gives you concretely: you can answer a resident asking what is done with their data.** The answer is a list of file pairs — written down, short, and true.

To be declared by the authority

Paired files: _____

Retention period for matches and their proofs: _____ months

Nothing is paired by default. A tool shipped with preconfigured pairings would decide on the authority's behalf what should be matched — and that decision is not a technical one.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined at the
