Seven items — value gap

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No line is corrected.** A corrected asset value changes a depreciation and a balance sheet: that belongs to the accountant, with the invoice in front of them.

#	Item	Asset register	Accounts	Gap	Document opened	Correct value
1	Utility vehicle	**€34,200**	€21,800	**€12,400**	Invoice	**Asset register**
2	Floor scrubber	€8,900	**€8,900**	—	Invoice	Both
3	Server	**€16,400**	€11,200	€5,200	Invoice	**Asset register**
4	Ride-on mower	€7,100	**€9,400**	€2,300	Invoice	**Accounts**
5	Hall furniture	€4,800	**€6,200**	€1,400	**None**	**Undetermined**
6	Kitchen equipment	€22,000	**€24,700**	€2,700	Invoice	**Accounts**

#	Item	Asset register	Accounts	Gap	Document opened	Correct value
7	Copier	**€5,600**	€3,100	€2,500	Invoice	**Asset register**

> **The "correct value" column does not follow one file over the other: it follows the document.** Three times the asset register, twice the accounts, once both, and once nothing at all — assuming one file was authoritative would have given the wrong answer four times out of seven.

Case 5 — no document

Check	Result
Invoice attached to either line	**None**
Purchase order found	No
Related contract	No
Value proposed	**None**

No value is proposed for case 5, and it is not dropped from the list for that reason. A gap with no document is still a gap: flagging it without settling it is more useful than silence, and more honest than picking the likelier value.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
