Two thousand three hundred and thirty-one complete chains, nine incomplete

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for demonstration. **A rebuilt chain looks exactly like a real one.**

What each processing carries

Element	Present?
The agent that produced it	**Yes**
The original source cited	**Yes — never another agent**
The version of the reference applied	**Yes**
Date and recipient	**Yes**
The list of agents traversed before	**Yes**

A decision passing through three agents looks as if the last one took it. Without the chain, the wrong link gets fixed, and the error comes back by the same route.

The nine incomplete

Element	Value
Cause	**Two agents did not log their source after an incident**
Most likely source guessable	**8 cases of 9**
Chains rebuilt	**0**
Note carried	**"Incomplete chain" — it does not come off**

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
