Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Each agent is consistent with itself: the contradiction exists only where the two outputs meet.**

Cause	Count	Nature of the problem
Two versions of an internal procedure	**19**	**Configuration**
Different scopes — both answers right	**7**	**None**
Real disagreement	**5**	**Content**

What is done with each group

Group	Action
The 19	**Flagged as a version gap — fixed once and for all**
The 7	**Explained: two situations that looked alike**
The 5	**Handed to the lead with both answers and their sources**

On the 5 real disagreements, supervision does not say which of the two answers is right.

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
