Where each entity's data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Six perimeters, no junction point · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Each entity is the controller of its own processing:** it, and not the group, decides why and how its data is processed. **The group is a governance perimeter, not a data perimeter** — the architecture takes that literally.

The two routes, and the criterion that separates them

Route	What it guarantees	When to choose it	Entities concerned
Local inference	**The model computes on a machine belonging to the entity; no content crosses an external network**	Data under client confidentiality agreements, drawings, trade secrets	**Rouen**
Isolated resource hosted in France	Environment dedicated to a single entity, under French law, no pooling	All other cases	Bourges, Orléans, Lyon, Namur, Zaragoza

What is guaranteed, in both cases

Guarantee	Scope	How it is verified
Hosted in France, under French law	All six entities, Belgium and Spain included	Hosting contract, resource location
0 data outside the European Union	Content, logs and backups	**Outbound flow log — 0 over two quarters**
Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	All entities	No subcontractor subject to US law
No data used to train a model	All entities	Contract clause, processing log
Encryption in transit and at rest	All entities	Acceptance check B4
Role-based access	11 distinct roles	Acceptance check B5, tested role by role
Complete logging	Every request, every approval	Acceptance check B6

What goes up to group level — the list is closed

What goes up	What never goes up
Number of operations per site	**The content of a file**
Document volumes	**The name of a file, a client, a supplier**
Availability and response times	**An extract, even anonymised**
Gaps against service commitments	**An attachment, a screenshot, a quotation**
Rework rate per use case	**The identity of whoever reworked**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Head office knows Bourges processed 1,100 documents in October; it cannot know which ones. This is not a cautious setting that could be loosened: **counters and content do not travel the same flows, and only counters leave the entity.**

To be completed by the group data protection officer

Date of the next review of the processing file, per entity: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

https://bluelemonagent.ai/en/entreprises/cas-usage/systeme-multi-agents-souverain-multi-sites

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
